COVID AuxiKit

TEAM NGUNI

COVID AuxiKit User Manual

The components of the AuxiKit works in synergy with one another to ensure the safety of the people by minimizing risk and exposure
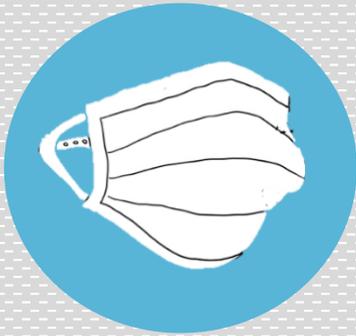

Self-sterilizing face mask

It is a simple face mask that is made from cotton and it comes with a strap. All you have to do is to adjust the strap to ensure a comfortable fit and to reduce pain on your earlobes.

Enhanced & reusable face shield

The face shield has a cap to prevent earlobes pain. In addition, the face shield can be adjusted by the strap to fit better around the neck if required or it can be left open.

UV Light Sterilizer

Switch on the sterilizer, you will have 30 seconds to leave the room before it begins the sterilization cycle. It also includes a display and keypad so you will be able to set the duration of the sterilization cycle.
